# WORLD SPACE WEEK

October 4-10, 2022

### World Space Week Highlights 2022

The World Space Week 2022 theme is "Space and Sustainability." During October 4-10, 2022 WSW will celebrate two branches of the topic to be covered-achieving sustainability in space, and achieving sustainability from space. Achieving sustainability from space is a different task - that addresses how space can help to achieve a cleaner, fairer and safer planet Earth.

## Celebration In Ahamenes

Ahamenes celebrate world space week on telegram channel with all members. Celebrate with us by following what we post on our channel. And engage with it. Watch recommended topics on YouTube.

### Theme

Our aim to celebrate WSW is to let everyone know the basics about Space, Universe and Astronomy. Like an introduction about Astronomy and some terms in this science.

## Ahamenes SSTC

To introduce our club Ahamenes named after an ancient Ethiopian astronomer. Ahamenes is a Space Science and Technology Club aimed to be an opportunity for AASTU students to learn about Space science each other like a community for Astronomy lovers and to create an environment to practice space technologies.
